

## **Welcome to my WordPress Security service Gig.**

Are you looking for a **WordPress malware removal** and **security specialist** who will **clean malware, fix hacked websites**, and strengthen your site against future attacks? No need to worry — I'll fix it properly and safely.

With over 3 years of hands-on experience in cybersecurity and WordPress troubleshooting, I've successfully recovered over 500+ websites from complex infections.

### **What I will do:**

- Full site scan (files + database) and manual code review
- Vulnerability Testing
- Remove malware, backdoors, phishing, and injected scripts
- Fix malicious redirects, pop-ups, and JS injections
- Remove "This site may be hacked" / Google blacklist issues
- Clean server / cPanel infected files
- Restore admin access
- Remove malicious admin users
- Update WordPress core, themes, and plugins safely
- Security Hardening
- Limit login attempts
- Disable file editing
- Hide WordPress version
- SSL Installation
- Protect from brute-force attacks
- Fix Japanese SEO Spam and SEO injections
- Protect from DDoS attacks
- Add security headers
- X-Frame-Options
- Referrer-Policy
- X-XSS-Protection
- Feature-Policy
- Recover Hacked Website
- .htaccess hardening, firewall rules, and recommended custom code
- Full backup before and after cleanup
- Clear cache, re-scan, and final report with remediation steps
- 1-year Support (Premium Package only)

### **Why choose me?**

- 3 years of hands-on experience
- Extremely Fast Delivery
- 500+ websites cleaned & secured
- 24/7 Help/Support on Fiverr
- No data loss — backups taken before work
- money-back guarantee

**Please message me** before ordering so I can confirm the right package for your case.
